JOURNAL OF APPLIED ELECTROCHEMISTRY 22 (1992) 1209–1214

Index to Volume 22 (1992)

The subject index has been organized into topics for easy reference.

Subject Index

Corrosion and protection

Influence of surface segregation of sulphur on the corrosion resistance of 270 nickel in acidic and alkaline media, 57
Corrosion rates of lead based anodes for zinc electrowinning at high current densities, 116
Effect of hydrogen on the impedance of passivating oxide films formed on aluminium in sodium nitrate solution, 151
Analysis of nonlinear Mott-Schottky plots obtained from anodically passivating amorphous and polycrystalline TiO_2 films, 156
Synergetic effect of electrode activation on the h.e.r. in alkaline medium on Pt, Pd, Ni and Cu electrodes, 166
Phase-structure analysis of brass by anodic linear-sweep voltammetry, 172
Voltammetric behaviour of iron in cement Part IV: Effect of acetate and urea additions, 224
Corrosion behaviour of electrogalvanized steel in sodium chloride and ammonium sulphate solutions; a study by EIS, 247
A model for the mechanism of nickel fluoride cold sealing of anodized aluminium, 268
The inhibition of corrosion and hydrogen embrittlement of AISA 410 stainless steel, 383
Benzenethiols as inhibitors for the corrosion of copper, 390
Slow strain rate and constant load tests of A285 and A516 steels in Bayer solutions, 396
The effects of silicate ion on the corrosion of zinc powder in alkaline solutions, 443
Electrochemical methods in the study of localized corrosion attack, 448
Influence of the heat treatment in the electrochemical corrosion of Al–Zn–Mg alloys, 541
Quantum mechanical calculations of amino pyrazole derivatives as corrosion inhibitors for zinc, copper and α-brass in acid chloride solution, 644
Effect of organic acids and bases on cathodic corrosion of aluminium in chloride solutions, 649
Impedance studies into the corrosion protective performance of a commercial epoxy acrylic coating formed upon tin plated steel, 795
Comportement electrochemique des alliages d'aluminium 2024 ET 7075 dans un milieu salin, 1065
Inhibiting and accelerating effects of some quinolines on the corrosion of zinc and some binary zinc alloys in HCl solution, 1104
Pitting corrosion of polycrystalline annealed copper in alkaline sodium perchlorate solutions containing benzotriazole, 1129
A comparative study of the electrochemical corrosion behaviour of dental amalgams, 1142
Effects of Ta, La and Nd additions on the corrosion behaviour of aluminium bronze in mineral acids, 1175

Effluent and water treatment

Adoucissement de l'eau à l'aide du réacteur électrochimique à film ruisselant, 364
Bifunctional electrodes for an integrated water–electrolysis and hydrogen–oxygen fuel cell with a solid polymer electrolyte, 1167

Electrocatalysis and kinetics

Electrochemical oxidation of manganese(II) at a platinum electrode, 21
Determination of electrode kinetics by corrosion potential measurements: zinc corrosion by bromine, 28
X-ray diffraction study of anisotropy by the formation and decomposition of nickel hydride Part II: Decomposition kinetics, 82
Oxygen reduction on Ru-oxide pyrochlores bonded to a proton-exchange membrane, 140
Electrocatalytic deposition of polypyrrole in the presence of bromide, 332
Comparative kinetic studies of polypyrrole electrogeneration from acetonitrile solutions, 369
Kinetics of hydrogen evolution on Ni–Al alloy electrodes, 376
Influence of nitrogen oxides on the electrocatalytic oxidation of sulphur dioxide, 424
The hydrogen evolution reaction in basic medium on iron electrodeposited with heteropolyacids, 436
Transition metal-based cathodes for hydrogen evolution in alkaline solution: electrocatalysts on nickel-based ternary electrolytic codeposits, 471
Electrochemical intercalation of sulphuric acid into CrO_3-graphite intercalation compounds in aqueous solutions, 535
Activation of passivated titanium anodes from the electrolysis of MnO_2, 593
Platinum-containing polypyrrole containing on stainless steel electrodes for oxygen reduction in aprotic media, 678
Preparation and properties of Raney nickel electrodes on Ni–Zn base for H_2 and O_2 evolution from alkaline solutions Part I: Electrodeposition of Ni–Zn alloys from chloride solutions, 705
Preparation and properties of Raney nickel electrodes on Ni–Zn base for H_2 and O_2 evolution from alkaline solutions Part II: Leaching (activation) of the Ni–Zn electrodeposits in concentrated KOH solutions and H_2 and O_2 overvoltage on activated Ni–Zn Raney electrodes, 711
Activation studies on titanium anodes used in MnO_2 electrodeposition, 722
Rechargeable thin film batteries of polypyrrole and polyaniline, 738
Electrochemical behaviour of zirconium metal and its oxide film in LiOH and HF solutions, 852
A nickel molybdenite cathode for the hydrogen evolution reaction in alkaline media, 888
Electrocatalytic oxidation of methanol on platinum microparticles in polypyrrole, 922
Correlation between the electrochemical properties of colloidal oxides and supported oxides on metallic substrates, 959
High area Ni–Zn and Ni–Co–Zn codeposits as hydrogen electrodes in alkaline solutions, 973
Amorphous nickel-valve metal–platinum group metal alloy electrodes for hydrogen–oxygen sulphuric acid fuel cells, 1017
Raney nickel activated H_2-cathodes Part I: Modelling the current/voltage behaviour of flat Raney nickel coated microporous electrodes, 1025
Raney nickel activated H_2-cathodes Part II: Correlation of morphology and effective catalytic activity of Raney nickel coated cathodes, 1031
Lanthanum phosphate-bonded composite nickel electrodes for alkaline water electrolysis, 1049
Characterization of hydrogen evolution on cobalt electrodeposits in water electrolysis, 1135

Electrochemical engineering

An analysis of the steady state thermal behaviour of electrolysers with recycle, 125
Effects of gas bubbles on the current and potential profiles within porous flow-through electrodes, 277
Primary current distribution in the Hull cell and related trapezoidal geometries, 301
A simplified approach to the thermal behaviour of electrolytic Dewar cell calorimeters, 347
Bubble effects on ion exchange membranes – an electrochemical study, 485
Current distribution in a gas-evolving electrochemical reactor with an expanded metal electrode, 585
Scale-up studies of an Fe/Cr redox flow battery based on shunt current analysis, 668
Combination of the amalgam cell and the membrane cell processes for chlor-alkali production, 699
Dynamic analysis of charge transport in fluidized bed electrodes: impedance techniques for electroinactive beds, 801
Numerical calculation of secondary current distribution in a two-dimensional electrochemical cell with a resistive electrode, 1113
A hydrodynamic model for water decomposition in electrolysers with solid polymer electrolytes, 1147
Experimental investigation of the primary and secondary current distribution in a rotating cylinder Hull cell, 1155

Electrochemical synthesis and production

The use of a porous hydrogen diffusion anode in the electrochemical reduction of glucose to sorbitol, 43
Indirect reduction of p-nitroaniline to p-phenylenediamine at a Ti/TiO_2 electrode, 179
The electrochemistry of Magnéli phase titanium oxide ceramic electrodes Part II: Ozone generation at Ebonex and Ebonex/lead dioxide anodes, 200
Formation of hypochlorite, chlorate and oxygen during NaCl electrolysis from alkaline solutions at an RuO_2/TiO_2 anode, 315
Electrochemical studies of the factors influencing the cycle stability of Prussian Blue films, 325
The behaviour of trickle tower electrolytic cell for the production of cobalt(III) acetate from cobalt(II) acetate, 351
The morphology and conductivity of polypyrrole/polyurethane alloy films, 358
Electroless nickel hydroxide: synthesis and characterization, 477
Observation of mixed valency in electrosynthesized nickel hydroxide, 482
The processing and mechanical properties of polypyrrole/polyurethane alloy films, 528
Electrochemical intercalation of sulphuric acid into CrO_3-graphite intercalation compounds in aqueous solutions, 535
Synthesis and properties of polyaniline obtained using sulphamic acid, 563
Comments on the estimation of caustic current efficiency of ion exchange membrane chlor-alkali cells, 675
Indirect anodic oxidation of anthracene to anthraquinone in a slurry electrolyte system in the presence of both surfactant and redox mediator, 743
Production of fluorine with pulsed currents, 765
Preparation of chiral diols by the osmium-catalysed indirect anodic oxidation of olefins, 810
Electrochemical reduction of Eu(III) using a flow-through porous graphite electrode, 865
Electrolytic preparation of magnesium perchlorate, 877
Spectral sensitization of sprayed thin film *n*-ZnO electrodes by 4-*p*-dimethylaminobenzylidene-1,2-diphenyl-2-imidazoline-5-onein acetonitrile solution, 883
Anodic oxidation of benzyl alcohol to benzaldehyde in the presence of both redox mediator and polymer-supported phase-transfer catalyst, 966
Galvanostatic electrochemical reduction of pentoses, 1055
Anion exchange activity of electrochemically bonded diamine on carbon fibres, 1060
Glassy carbon surface effects on the electroreduction of aromatic carbonyl compounds Part III: Vanillin, 1072
Electrochemical reduction of nitrogen oxyanions in 1 M sodium hydroxide solutions at silver, copper and $CuInSe_2$ electrodes, 1077
Product-selective electroreduction of 2,3,4,5,6-pentafluorobenzoic acid to 2,3,5,6-tetrafluorobenzyl alcohol and 2,3,5,6-tetrafluorobenzaldehyde in a flow cell system, 1082
Synthesis of chloroanilines at a Ti/ceramic TiO_2-cathode, 1087
Chlorate electrosynthesis current efficiency equations based on dimensionless groups, 1185
Electrolytic reduction of *o* and *m*-nitroanilines at a Ti/ceramic TiO_2 cathode, 1192
Electrolytic preparation of magnesium chlorate from magnesium chloride, 1201

Energy conversion, batteries and fuel cells

Thin-film catalysts layers for polymer electrolyte fuel cell electrodes, 1
Conductive fillers for immobilized alkaline zinc anodes, 95
Projection of improved high rate discharge performance for homogenized cathode Li/I_2 (P2VP) batteries, 99
Improved cycle life performance of Zn/NiOOH cells using a stabilized zinc electrode, 182
Properties of electrochemically synthesized polymer electrodes Part VII: Kinetics of poly-3-methylthiophene in lithium cells, 189
Properties of electrochemically synthesized polymer electrodes Part VIII: Kinetics of polypyrrole in polymer electrolyte cells, 195
Analysis of radiation-grafted membranes for fuel cell electrolytes, 204
Secondary aluminium–iron (III) chloride batteries with a low temperature molten salt electrolyte, 230
Cyclic voltammetric investigation of the formation of intermetallic phases at an LiAl electrode in methyl acetate, 255
Investigations on N-halogen cyclic ureid based magnesium primary cell system at various temperatures, 285
The use of redox polymerization electrodes in lithium batteries with liquid electrolytes, 307
Microcalorimetric study of the self-discharge of the $NiOOH/Ni(OH)_2$ electrodein a hydrogen environment, 408
Impedance parameters of individual electrodes and internal resistance of sealed batteries by a new nondestructive technique, 456
In situ Raman spectra of electrode products during electrolysis of $HgCl_2$ in molten LiCl–KCL eutectic, 517
Electrotransformations at some lead-antimony alloy/sulphuric acid interfaces, 571
Cycling behaviour of lithium–aluminium alloys formed on various aluminium substrates as negative electrodes in secondary lithium cells, 620
Comparison between the impedance spectra of $Li/SOCl_2$ batteries obtained using the time and the frequency domain measurement techniques, 638
Influence of electrodic properties on water management in a solid polymer electrolyte fuel cell, 663
Rechargeable thin film batteries of polypyrrole and polyaniline, 738
High-rate discharge of poly 3-methylthiophene cathodes in inorganic electrolytes, 817
Ethylene carbonate-based organic electrolytes for electric double layer capacitors, 901
Further studies of a zinc–air cell employing a packed bed anode Part I: Discharge, 909

Further studies of a zinc–air cell employing a packed bed anode Part II: Regeneration of zinc particles and electrolyte by fluidized bed electrodeposition, 916
Aqueous polysulphide flow-through electrodes: effects of electrocatalyst and electrolyte composition on performance, 927
Development of alloy electrocatalysts for phosphoric acid fuel cells (PAFC)*, 995
Development of long-lived high-performance zinc–calcium/nickel oxide, cells, 1039
Electrochemical impedance spectroscopy of small Ni–Cd sealed batteries: application to state of charge determinations, 1121
Bifunctional electrodes for an integrated water–electrolysis and hydrogen–oxygen fuel cell with a solid polymer electrolyte, 1167

Instruments, methods and analysis

A general computational approach to linear sweep voltammetry at channel electrodes, 38
A well-defined reference electrode in acetonitrile, 304
The numerical inversion of the Lapiace transform applied to impedance spectroscopy, 553
Determination of arsenic(III) in caustic melts, 581
Transient measurements at the wall-jet ring disc electrode, 1011
Automatic measurement of the conductivity of an electrolyte solution by FFT electrochemical impedance spectroscopy, 1180

Mass transfer and hydrodynamics

An experimental study of mass transfer in pulse reversal plating, 240
Free convective mass transfer at vertical cylindrical electrodes of varying aspect ratio, 429
Effect of gas sparging on mass transfer in zinc electrolytes, 596
Local mass transport effects in the FMOI laboratory electrolyser, 613
Oxygen as a tracer for measurements of steady and turbulent flows, 835
Mass transfer in an electrochemical reactor with two interacting jets, 950
Mass transfer at rotating ring-cone electrodes, 1091
The role of mass transfer in the electrolytic reduction of hexavalent chromium at gas evolving rotating cylinder electrodes, 1161

Metal and alloy deposition, dissolution and coating

Oxidation of some reducing agents used in electroless plating baths at gold anodes in aqueous media, 48
A tartrate-based alloy bath for brass-plated steel wire production, 64
Role of indium in promoting anodic dissolution of Al–In alloys in non-aqueous electrolyte, 131
A xylene electrolyte modified by trimethylchlorosilane for electrodeposition of aluminium, 235
Electrodeposition and characterization of amorphous Cr–P alloys, 341
Studies of platinum electroplating baths Part I: The chemistry of a platinum tetrammine bath, 415
Studies of palladium electrodeposition from baths based on $Pd(NH_3)_2X_2$ Part II: X = Br and X = NO_2, 421
X-ray diffraction and thermal wave analysis of primary recrystallization in electrodeposited copper layers at room temperature, 464
Metallo–organic deposition of tungsten oxide films from alkylammonium tungsten solutions, 501
Voltammetric study of plating baths for electrodeposition of Co–W amorphous alloys, 506
Effect of a polyethoxylate surfactant on the electrodeposition of tin, 558
Electrodeposition of zinc–nickel alloy coatings from a chloride bath containing NH_4Cl, 657
The effect of PbO on zinc electrodeposition from zincate solutions, 693
Influence of substrate on the electrodeposition of nickel–molybdenum alloys, 749
Electron conducting organic coating of mild steel by electropolymerization, 756
Electrodeposition and characterisation of amorphous Fe–Cr–P–C alloys, 787
Physicochemical properties of electrodeposited lead dioxide: effect of deposition current density, 825
Current-potential relationships for the half-reactions in two electroless nickel plating baths using the quartz crystal microbalance electrode, 830
Growth of electrodeposited copper on anodized titanium, 843
Electrodeposition of nickel on vitreous carbon: influence of potential on deposit morphology, 872
Effect of some dialkyl-, diaryl and diarylakyl–disulphide derivatives on copper electrodeposition, 978
Effect of the structure of aromatic disulphides on some physico-mechanical properties of electrodeposited copper coatings, 987
Nodulation of electrodeposited copper in the presence of thiourea, 1002

Mineral and metallurgical electrochemistry

Activated basket anodes from nickel powder Part II: Fabrication of anodes by a liquid phase sintering process, 8
Activated basket anodes from nickel powder Part III: Electrochemical behaviour of sulphur activated anodes, 16
Nickel and cobalt synergism effect in zinc electrowinning from sulphate electrolytes, 73
A validated mathematical model for a zinc electrowinning cell, 104
X-ray diffraction study of anisotropy by formation and decomposition of nickel hydride Part I: Orientation dependence of the extent of phase transformation of nickel into nickel hydride, 262
The degradation of aluminium cathodes by fluoride ion during zinc electrowinning, 606
Scale-up effects in modelling a full-size zinc electrowinning cell, 687
One step recovery of nickel by an electrohydrometallurgical process, 779
Electrochemical study of surface oxidation and collectorless flotation of arsenopyrite, 1095

Molten salt electrochemistry

Cathodic deposition of refractory intermetallic compounds from FLINAK melts Part II: Preparative cathodic deposition of TiB_2 and ZrB_2 and coatings thereof, 161
Influence of the partial pressure of oxygen on the redox chemistry of multivalent elements in molten sodium tetraborate, 293
In situ Raman spectra of electrode products during electrolysis of $HgCl_2$ in molten LiCl–KCl eutectic, 517
Study of the electrochemical reduction of lead chloride on a liquid lead electrode in NaCl–KCl melt, 577
Secondary processes during tantalum electrodeposition in molten salts, 628

Electrodeposition of refractory carbide coatings from fluoride melts, 717
Electronic conductivity of salt-rich Li–LiCl melts, 1110

Solid electrolytes

Nonstoichiometry in perovskite-type oxide Ca1-xCexMnO3- and its properties in alkaline solution, 821
Determination of electronic conductivity limits of mullite and ZrO2–9 mol% MgO solid electrolytes, 859

Thermodynamic and physical properties

Electrical conductivities of aqueous $ZnSO_4$–H_2SO_4 solutions, 215
Electrochemical investigation of the diffusion of lithium in β-LiAl alloy at room temperature, 728
Diffusion of a gas through a membrane, 770
Conductance of suspensions with conducting particles, 935

Photoelectrochemistry

Cd(SeTe) septum photoelectrochemical cells, 87
